[+ New Job](#)

- ▶ **Flock: Pull RAW data daily by API - chunks 1 Pull data from Flock Safety API server daily at midnight for the entire previous day in chunks**
- ▶ **Recurring BOSS4: asynchronous - goes back two days Catchup job for BOSS4 into Postgres with entity sets broken out by agency**  **in 5h24m**
- ▶ **Recurring BOSS4 - Fremont: asynchronous - goes back two days Catchup job for Fremont only, from BOSS4 into Postgres and the agency entity sets**  **in 8h24m**
- ▶ **Recurring BOSS4 - Fremont: realtime - hourly Hourly job for Fremont only, from BOSS4 into Postgres and the agency entity sets**  **in 29m**
- ▶ **Recurring BOSS4: realtime - hourly Hourly job for BOSS4 into Postgres with entity sets broken out by agency**  **in 34m**
- ▶ **Recurring BOSS4 - Santa Clara Sheriff: asynchronous - goes back two days Catchup job for Santa Clara Sheriff only, from BOSS4 into Postgres and the agency entity sets**  **in 12h24m**
- ▶ **Recurring BOSS4 - Santa Clara Sheriff: realtime - hourly Hourly job for Santa Clara Sheriff only, from BOSS4 into Postgres and the agency entity sets**  **in 39m**
- ▶ **Recurring Flock - Images: realtime - 3-hour Flock images - large data stream slows down regular Flock integration, so this is done separately**  **in 1h44m**
- ▶ **Recurring Flock: Pull RAW data daily by API - chunk 1 Pull data from Flock Safety API server daily at midnight for the entire previous day - chunk 1**  **in 4h34m**
- ▶ **Recurring Flock: Pull RAW data daily by API - chunk 2 Pull data from Flock Safety API server daily at midnight for the entire previous day - chunk 2**  **in 4h34m**
- ▶ **Recurring Flock: Pull RAW data daily by API - chunk 3 Pull data from Flock Safety API server daily at midnight for the entire previous day - chunk 3**  **in 4h34m**
- ▶ **Recurring Flock: Pull RAW data daily by API - chunk 4 Pull data from Flock Safety API server daily at midnight for the entire previous day - chunk 4**  **in 12h34m**
- ▶ **Recurring Flock: Pull RAW data daily by API - chunk 5 Pull data from Flock Safety API server daily at midnight for the entire previous day - chunk 5**  **in 12h34m**
- ▶ **Recurring Flock: Pull RAW data daily by API - chunk 6 Pull data from Flock Safety API server daily at midnight for the entire previous day - chunk 6**  **in 10h34m**
- ▶ **Recurring Flock: Pull RAW data daily by API - chunk 7 Pull data from Flock Safety API server daily at midnight for the entire previous day - chunk 7**  **in 13h34m**
- ▶ **Recurring Flock: Pull RAW data daily by API - chunk 8 Pull data from Flock Safety API server daily at midnight for the entire previous day - chunk 8**  **in 15h34m**
- ▶ **Recurring Flock: realtime - 6-hour Runs every 6 hours on 6-hour chunks of data**  **in 29m**
- ▶ **Recurring Flock: realtime - catchup The recurring Flock job scheduled for 2 am PST never runs - this runs it later on**  **in 16h24m**
- ▶ **Recurring SCSO: asynchronous - goes back two days Catchup job for SCSO into Postgres with entity sets broken out by agency**  **in 4h47m**
- ▶ **Recurring SCSO: realtime - hourly Hourly job for SCSO into Postgres with entity sets broken out by agency**  **in 34m**
