With the upcoming changes to our ingestion for Flock, I figure this is the last & best opportunity to review the agencies and add in any new ones. This list is according to my view of the Admin interface on Flock's website; the number to the right is the number of cameras, and note that some end in "CA PD" or "PD CA" or start with "City of..." but that may be more cosmetic versus what you'll see in the data.

Let's aim to get all the Northern California sources:

American Canyon CA PD	1
Anderson City CA PD	7
Atherton CA PD	50
Benicia CA PD	45
Brisbane CA PD	14
Burlingame CA PD	14
City of Fremont	5
City of Millbrae CA	23
Colma CA PD	6
Concord CA PD	29
Contra Costa CA SO Alamo P2	12
Contra Costa CA SO Alamo P5	6
Contra Costa SO Bay Point	9
Danville CA PD	37
Dixon CA PD	23
Gilroy CA PD	35
Hayward CA PD	28
Hercules CA PD	25
Hillsborough CA PD	11
Kaiser Permanente - Vallejo (CA)	13
Livermore CA PD	17
Milpitas CA PD	35
Morgan Hill CA PD	50
NCRIC	16
Newark CA PD	20
Novato CA PD	4
Oakley CA PD	5
Orinda CA PD	6
Piedmont CA PD	39
Pleasanton CA PD	4
Salinas CA PD	19
San Bruno CA PD	20
San Joaquin County CA SO	25
San Leandro PD CA	30
San Mateo CA PD	31
San Mateo County CA SO	12
San Ramon CA PD	46
Santa Clara CA PD	15
The Presidio Trust CA PD	4
Tracy CA PD	46
Vacaville CA PD	137
Vallejo CA PD	88

That's about 42 agencies and 1000 cameras. Hypothetically if we're looking to throttle at 500K/day, that's approximately 500 reads/camera/day or 10,000 reads/agency/day. I'll follow your lead here.

Maybe nice-to-have would be Orange County, but I'm hesitant to invest a ton of storage in Ontario, so if you want to advise against this I'll comply. Especially if the per-agency engineering effort is a lot, then let it go.

Lakeport CA PD	9
La Habra CA PD	7
Los Alamitos PD CA	12
Ontario CA PD	91
Seal Beach CA PD	1

Have a great weekend,

Brian M. Rodrigues
